

Benchmarking across Borders

FINANCIAL SERVICE PROVIDERS' SOCIAL AND FINANCIAL DATA

Make the Difference
We Prove It

With the support of

With the participation of

Validated data on Financial Service Providers' (FSP) pricing, client protection, social and financial performance

Benefits for Associations providing data

Benchmark overview

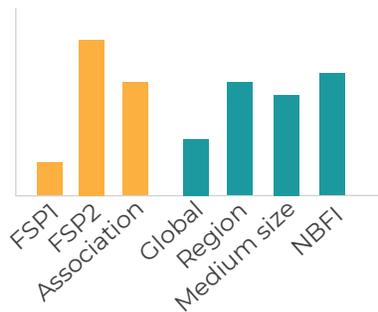

Non subscribing associations receive a benchmark overview for free, to compare the FSPs key indicators with the benchmark on ATLAS (global or regional average depending on nominative vs anonymous provision of data of the majority of FSPs). **Subscribing associations** access the detailed data and benchmark available on ATLAS, according to the subscription option they choose.

In addition to the access to data online, subscribing associations can request to export the data they have reported in a consolidated manner to Excel, for their internal purpose.

FSPs members of the association with data reported receive a benchmark overview (global or regional average depending on nominative vs anonymous provision of data).

Portfolio quality

APR

Price Disclosure Award

FSPs members of the association who report the Annual Percentage Rate (APR) can request the **Price Disclosure Award** for free, recognizing their transparent APR disclosure (gold or silver depending on nominative vs anonymous provision of data).

International visibility

FSPs providing nominative data increase their **international visibility** with the subscribing investors, who will see their names on the website.

Quality

The data are validated by a third party or self-reported and checked for consistency.
