Validated data on Financial Service Providers' (FSP) pricing, client protection, social and financial performance
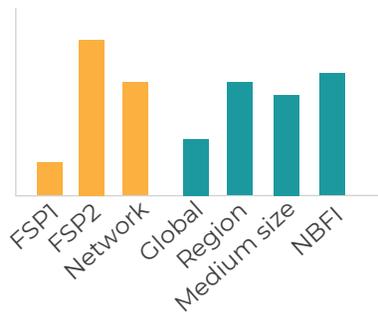

Benefits for Networks providing data

Benchmark overview

Non subscribing networks receive a benchmark overview for free, to compare the FSPs key indicators with the benchmark on ATLAS (global or regional average depending on nominative vs anonymous provision of data of the majority of FSPs). **Subscribing networks** access the detailed data and benchmark available on ATLAS, according to the subscription option they choose.
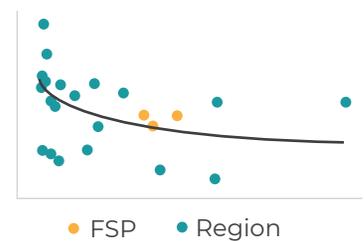

In addition to the access to data online, subscribing networks can request to export the data they have reported in a consolidated manner to Excel, for their internal purpose.

The FSPs members of the network with data reported receive a benchmark overview (global or regional average depending on nominative vs anonymous provision of data).

Portofolio quality

FSP1 FSP2 Network Global Region Medium size NBFI

APR

• FSP • Region

Price Disclosure Award

FSPs members of the network who report the Annual Percentage Rate (APR) can request the **Price Disclosure Award** for free, recognizing their transparent APR disclosure (gold or silver depending on nominative vs anonymous provision of data).

International visibility

FSPs providing nominative data increase their **international visibility** with the subscribing investors, who will see their names on the website.

Quality

The data are validated by a third party or self-reported and checked for consistency.
